TCI: Texas Congestion Index - ratio of the peak period average travel time to the freeflow travel time. A value of 1.20 means that a 30 minute trip during light traffic would take 36 minutes during peak periods.

PTI: Planning Time Index - (a reliability measure) ratio of the 95th percent peak period travel time to the freeflow travel time. A value of 2.50 means that for a 30 minute trip in light traffic, 75 minutes should be planned.

CSI: Commuter Stress Index - the same as the TCI except it is for the peak direction of travel only.
