

Its Cold and Flu Season,
so we're talking
Congestion

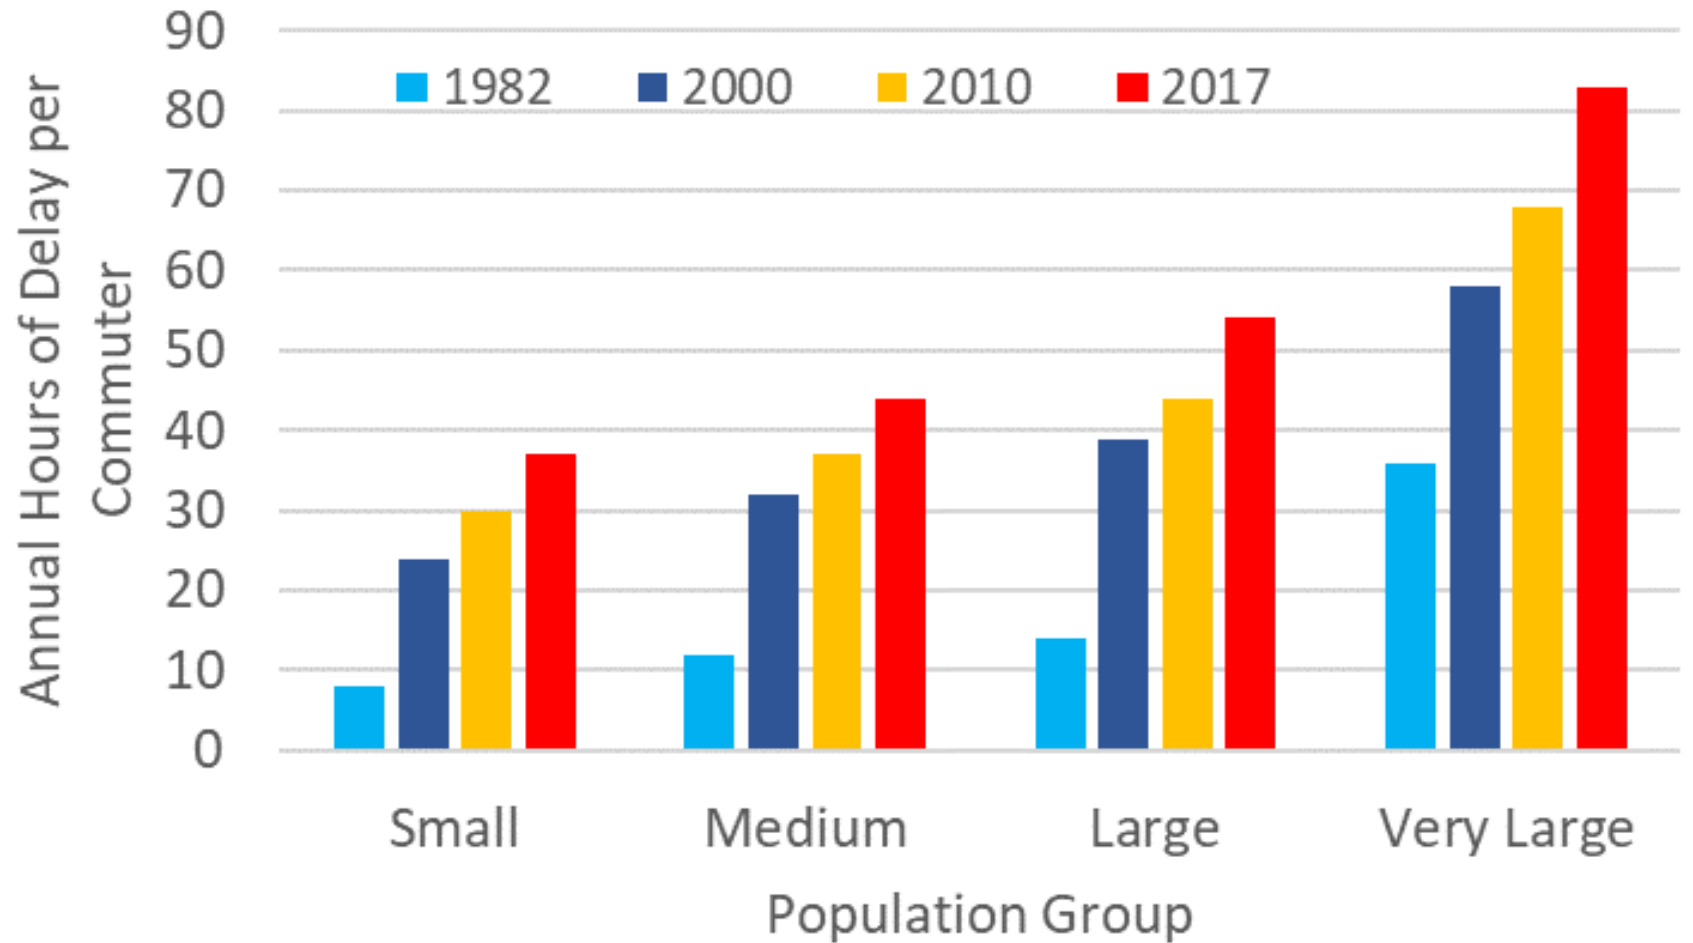

Tim Lomax

Texas A&M Transportation Institute

Texas Transportation Forum

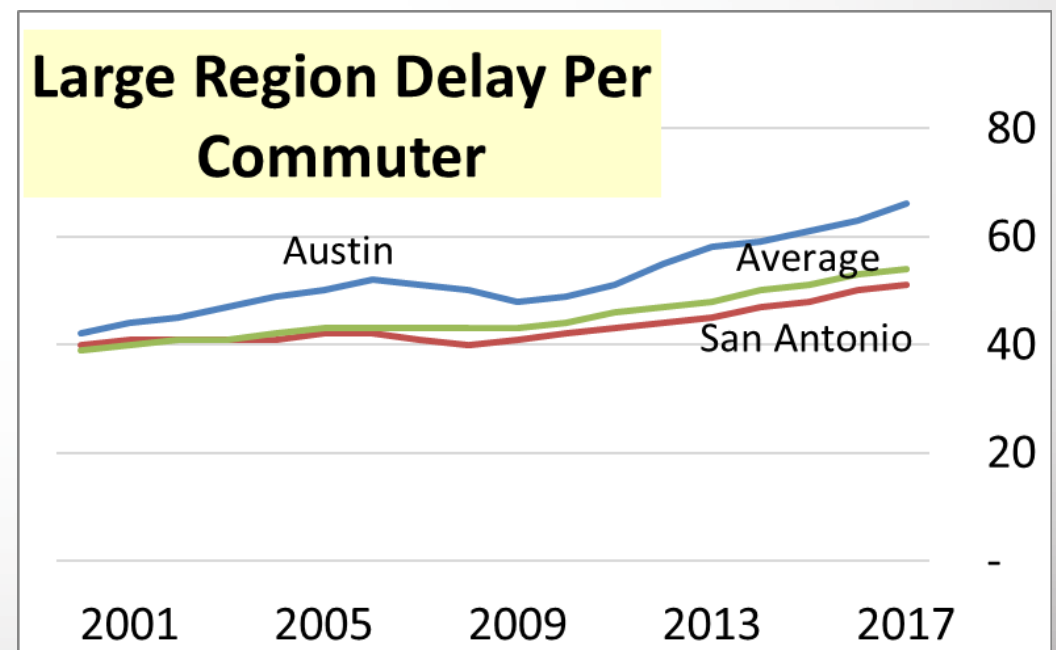

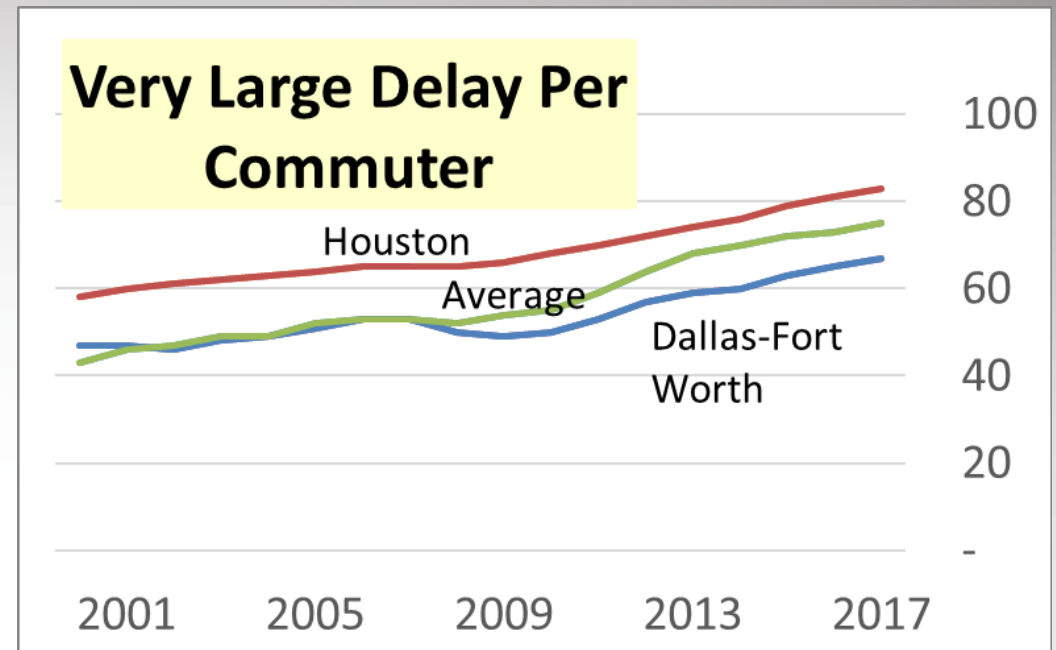

February 2020

Congestion is getting worse in regions of all sizes

Population growth has been much faster than in comparably sized regions...

..... and congestion has also increased faster than average.

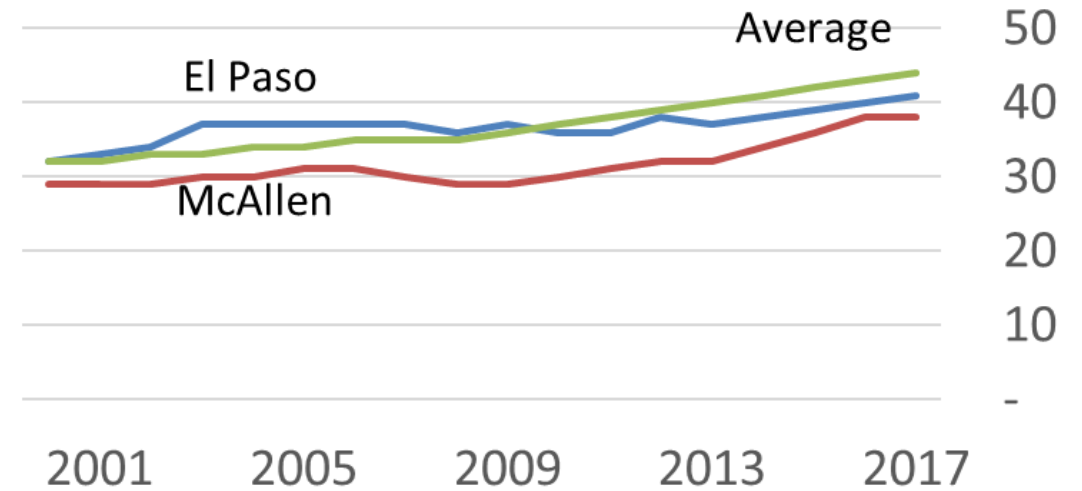

Population growth has been much faster than in comparably sized regions...

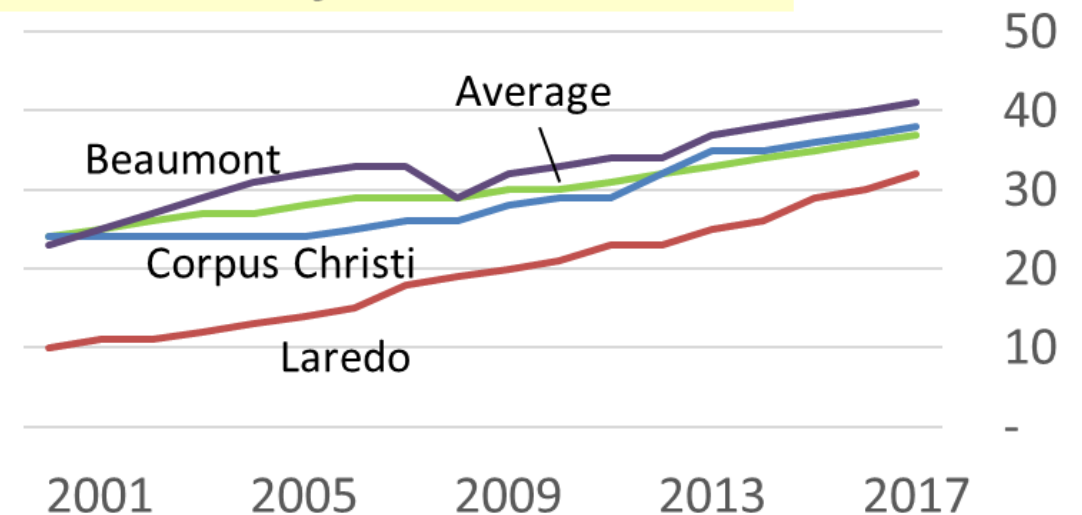

..... and congestion has also increased faster than average....

...even in regions under 1 million population

Medium Delay Per Commuter

Small Delay Per Commuter

- When we invest in transportation improvements, there are benefits.
- 80 percent increase in daily volume
- Peak-hour speeds same or slightly less.
- Midday congestion has not returned
